

MOLLE II Large Rucksack

The Military Surplus MOLLE II Large Rucksack is an update of the original MOLLE Rucksack that was introduced to replace the aging ALICE system. The MOLLE II system incorporates a larger main pack, also known as the "10th Mountain Ruck" that holds 5,000 cubic inches of cargo. The MOLLE II Ruck features a cinch cord top-loading design that allows for the attachment of MOLLE compatible pouches to the outside of the ruck and waist belt, adding greatly to the overall load carrying capacity.

FEATURES

- Style: Rucksack
