

Marine Corps Combat Desert Jacket

The CDJ is a lightweight, wind resistant, water repellent jacket intended to provide multi-season environmental protection in desert environments. It provides protection against wind, blowing sand and light rain/snow, will have a minimal impact on the combat load and utilizes desert MARPAT printed fabrics that feature moisture management, odor reduction and breathability characteristics.

FEATURES

- Five pockets with water resistant zipper closures two chest, two lower front, and one upper sleeve.
- A rank tab on the left front chest.
- Collar has a stowed balaclava (hood).
- A light weight four-way stretch material in the underarm and upper back panels reduces bulk and provides mobility and ventilation.
- Sleeves have reinforced elbows, a rank tab, and adjustable wrist closures.
- The sleeves end in a monkey paw configuration that provide additional hand protection and insulation. (later eliminated.)

COLORS

- Woodland
- MARPAT
