

The Paraclete Maritime Security Floatation Armor System (MSFAS)

The Paraclete Maritime Security Floatation Armor System (MSFAS) Carrier Kit provides:

- Water and wear resistant Trelleborg material
- Configured for NSW Swimmer cut plates and 6x6 or 5x7 side plates.
NO ARMOR IS INCLUDED WITH THIS CARRIER.
- Paraclete's proprietary Trauma Reduction System (TRS)
- FirstSpear Tubes™ for quick emergency doffing eliminating complicated cable release systems
- FirstSpear 6/12™ Pocket Attachment System provides lightweight and snag resistant pouch attachment that is fully backwards compatible with current MOLLE pouches
- Front/rear inflatable buoyancy compensators providing a combined minimum 10lbs of positive lift in size Large.
- Pre-assembled and pre-configured buoyancy compensators with oral inflation arrangement pre-set.
- Two manually activated Cummerbund Tactical Floatation Safety Systems (CTFSS) that are inflated by two 38 Gram CO2's.
- In sea water, the system provides a minimum of:
 - * 80lbs. of lift on the surface
 - * 57lbs. of lift at 15 feet
 - * 45lbs. of lift at 33 feet
