

**For Immediate Release**

## **Point Blank Enterprises and Genetec Inc. to Provide Body Worn Cameras and Case Management System to North Miami Police Department**

**Helps Police Department Meet Body-Worn Camera Policy and Implementation Programs While Lessening Officers' Workload and Speeding Up Investigations**

**Pompano Beach, FL and Montréal, QC—February 28<sup>th</sup> 2016**—Point Blank Enterprises (“Point Blank” or “PBE”), the worldwide leader in the production of soft body armor and related protective solutions, today announced that it has been awarded a five year contract by the North Miami City Council to provide the North Miami Police Department with IRIS Cam body worn cameras, together with a collaborative case management system from [Genetec Inc.](#) (“Genetec”), a leading provider of open-architecture security and public safety solutions.

PBE and Genetec will offer the city of North Miami Police Department an integrated system that combines 120 IRIS Cam body-worn cameras and [Genetec Clearance™](#), a case management system designed to accelerate investigations by enabling different organizations to collect, manage and share video evidence.

The IRIS Cam is designed to meet the growing demand for law enforcement agencies to provide a visual and audio record of officers’ interactions with the public and help agencies improve evidence collection and enhance officer accountability. Built in a ruggedized enclosure, the IRIS cam provides ultra-high definition recording with a 140° FOV, for getting even closer to the action. Additionally, the IRIS Cam ensures not a moment is missed with 30 seconds of pre-recording.

The Genetec Clearance™ case management system is designed to speed up investigations by enabling different organizations to collect, manage and share video evidence, and other relevant case information. It allows police officers, investigators and security managers to gather digital evidence from the IRIS Cam and other sources—such as cellphone footage from bystanders and witnesses and store surveillance video—and easily store, manage, review and share it from a single application.

The integration of the IRIS Cam system with Genetec Clearance™ allows for quick and simple uploads, saving officers time at the end of their shift. Post-incident tagging can also be added to the recording, to help with further classification of the event and to aid in locating the file for future searches or investigations.

With built-in video redaction, Genetec Clearance™ protects the privacy of bystanders by allowing identifiable information to be masked, if video must be shared with 3rd parties or when fulfilling public record requests. All user actions initiated within the system, whether internal or external, are automatically tracked to ensure the chain of custody of the evidence is maintained at all times.

“The IRIS Cam system and Genetec Clearance will help the city of North Miami Police Department achieve a streamlined and highly effective process of capturing, managing and administering video evidence, which will ultimately save the city time and resources in managing cases over the long term,” stated Paulo Motoki, Chief Operating Officer, Point Blank Enterprises. “With over 40 years of trusted service to law enforcement agencies around the world, we are proud to provide a unique hardware/software turnkey solution that will help strengthen accountability and transparency. This will result in more constructive encounters between the police and members of the community,” added Motoki.
