

LIGHTWEIGHT RIFLE-RATED DEFENSIVE POSITION

We have incorporated the latest in modern armor technology to create the SOB NEMESIS™, one of the lightest and most nimble rifle-rated defensive positions available. We designed this system for situations where optimal mobility, lightning-fast deployment, and efficient transport are essential to success.

The SOB NEMESIS™ is available in lightweight NIJ level 3 armor, as well as NIJ level 3-Plus armor which is certified to defeat the special threats of the M855 and 7.62x39 MSC. As with all SOB defense systems, the viewport and bolt faces are certified to the same ballistic rating as the surrounding armor.

The system features a removable shield that can be quickly detached and used independently as a hand-carry shield. The SOB NEMESIS™ also has an integrated FoxFury light. The entire system folds in half for convenient storage and transport. The wheels are self-healing and maintain functionality even after taking direct gunfire.
